1-There are 4 reading passages. Please paraphrase 2 of them. (4)

A)

Creative thinking requires an attitude that allows you to search for ideas and manipulate your knowledge and experience. With this outlook, you try various approaches, first one, then another, often not getting anywhere. You use crazy, foolish and impractical ideas as stepping stones to practical new ideas. You break the rules occasionally, and explore for ideas in unusual outside places. In short, by adopting a creative outlook, you open yourself up both to new possibilities and to change.

B)

Effective listening is a learned skill; it doesn't happen automatically for most people. In addition, there are few rewards for listening, but there are punishments for not listening. How do you feel when listeners are not paying attention to you by looking at their watches, doing some activity, or not acknowledging what you've said? You probably felt put down or, even worse, you felt like you were talking to a wall. Listeners have a lot more power and impact on the talker than most people realize.

C)

But despite the wealth of information, students don't appear to be eating any healthier than their predecessors. "They may be more health conscious, but that doesn't necessarily mean they're eating healthy," says Robin L. Porter, the president of H. David Porter Associates Inc., an independent food consulting business based in Crofton, Maryland that works with 70 colleges. "They talk the talk, but don't really walk the walk-french fries outsell apples by thousands and thousands of pounds."

D)

The isolation is part of the brainstorming process. A personnel manager said: "We want excellent students who are active, clever and tough. Three months is enough to train them to be devoted businessmen." I would hear my colleagues saying: "I'm not making any profit for the company, so I'm not contributing." Very few employees claim all the overtime pay due to them. Keeping an employee costs the company 50 million yen (\$400,000) a year, or so the company claims. Many employees put the company's profits before their own mental and physical well-being.
